

Control your Air Conditioner with your smartphone

M Climate is a universal Wi-Fi AC Controller.

All you need is Wi-Fi.

- Control your AC with your smartphone.
- Make any brand or model of AC smart.
- Save up to 25% on electricity.
- Maintain the perfect room temperature.

Ingenious technology.

M Climate connects with your smartphone via the Internet. When you send a command from the mobile app, M Climate will simulate the AC's remote control and send the IR signal, correspondingly to the command.

Out of town, at your villa, at work, or stuck in traffic...

Launch our App and:

- Adjust temp
- Fan/cool/dry
- Fan speed
- Check humidity
- Set timers
- Geo-location detection

3-minute installation

You don't need any special skills to install M Climate. Here's how it's done in less than 3 minutes:

- 1 Place M Climate so there are no barriers between the device and your AC.
- 2 Plug M Climate into a socket.
- 3 Download the mobile application from the AppStore or Google Play and follow the instructions.

Value proposition

- Add smart-home value to your portfolio.
- Offer smart features with every split AC.
- No matter the AC brand or model.
- By-far the most affordable solution.
- The technologically superior solution.

Get one! Test it! **See for yourself!**

Are you an independent distributor of ACs?

Sell easier any brand or model AC – smart automation at a fraction of the cost.

- Make your portfolio more diverse and competitive.
- Add the smart automation features to all brands and models.
- Offer your clients the superior technology product.

Are you a retailer or wholesaler?

This product sells itself!

- A next-generation home-automation product.
- Super easy to self-install.
- Saves up to 25% on energy.
- Extends the AC's life with up to 15%
- Technologically superior.
- By-far the most affordable.

Are you an air and water treatment products manufacturer?

Follow the trends of IoT.

- Save millions in R&D.
- Ready to integrate technology for air conditioners, water heaters and space heaters.
- Built-in smart ee algorithms.
- Stable and light mobile/web technology.
- Time to market – a quarter, not years.

Are you a HVAC maintenance company?

Bring the cool smart-home automation features to all your existing clients.

- Cut down your costs and maintenance visits.
- Be always on time and prepared.
- Be a pro-active not re-active service provider.
- Extend your account's life by up to 15%

How did we get here?

The trends:

- Climatic volatility increases.
- Energy costs rising.
- Buyers' capabilities lowering.
- IoT and big data.
- Green-home-automation philosophy.

We shared a common passion for automation and robotics.
So, where to invest this genius and create real-disruptive value?

The most affordable and genius-packed solution.

M Climate – the universal Wi-Fi controller for split/window ACs.
And soon you will meet:

The sister - **Vicki**:
